

Therapy Air Ion's Best Features

Wall-Hanging Slim Design (Option)

The slim design makes the unit suitable for wall hanging for a pleasant decoration effect.

Rhythmic Cleaning Operation Mode

This mode is designed for optimal indoor air circulation and the rapid removal of pollutants.

Silent Operation at Night (Bedtime Mode)

The unit automatically operates silently to create a pleasant atmosphere at night.

Safety Design for Customers

All operations stop automatically if the front cover is opened. The air intake/outlet is designed to ensure your safety and prevent accidents.

Mood Light

You can select a colour from the front of the unit for mood lighting.

Child Mode

The air circulation speed is lowered to prevent children from feeling cold.

Remote Control

The remote control is supplied for convenience.

Protection Everywhere

Therapy Air Ion is Zepter International's powerful and side-effect-free Home Care device and represents the most effective and modern solution to your quest for purified air. It is the solution to some of the greatest problems of our modern lifestyles including an environment that increasingly provokes more illnesses, chronic flu-like conditions, air pollution and health hazards in the home that can cause allergies, respiratory and coronary diseases and cancer.

We all now have the opportunity of enjoying such a device: individual customers can position one in their own homes or

at the office. Fashion lovers will not want to miss out on this state-of-the-art device, bartenders and restaurateurs can offer their customers one more reason to come to their premises.

Therapy Air Ion is a highly fashionable, decorative item. It fits in perfectly at home and at the office and is indispensable towards fighting allergies or asthma. The same applies to the work environment, crowded areas, restaurants, gyms, cinemas and anywhere else that people gather, live, eat and work.

Above all, it is ideal for your home where you and your family spend most of your time.

INTERNATIONAL
HOME CARE

Everyday Risk Factors

Progress and technology have enormously improved our lives though with some serious new implications:

- our environment **increasingly provokes more illnesses;**
- our homes are invaded by dust, allergens, irritants, chemicals and tobacco smoke;
- the EPA (Environment Pollution Agency) has detected the **Sick Building Syndrome**, i.e. a flu-like chronic condition affecting people who live in modern buildings built with cheap artificial materials which emit toxic substances;
- **air pollution (natural and man-made):** every year, billions of tons of dust rise into the atmosphere, are carried by air currents and spread all over the planet;
- **indoor levels of toxic substances in the air** are from 40 to 100% higher than outdoors. The main reasons for this are house dust, allergens and irritants, toxins from evaporated detergents and chemicals, tobacco smoke, soot, smoke from combustion and unpleasant smells;
- **allergies** are increasingly caused by house dust, mites, mould, pollen, insects etc.;
- **irritations, respiratory and coronary diseases, cancer** are caused by passive smoking, especially in children.

One person alone cannot change the global picture, but he can help himself and his family.

The most effective, up-to-date solution is **Therapy Air Ion**, the revolutionary, powerful and side-effect-free Home Care device designed by Zepter International.

Therapy Air Ion The Ultimate Breath-Giving Innovation

This high performance, high-tech device is both beautiful and easy to use. It is based on revolutionary technology to keep living spaces clean and safe. **Therapy Air Ion is the Home Care product you have been waiting for.** Reproducing natural mechanisms, **Therapy Air Ion** is as **multi-functional as technically advanced** and as **stylish as it is easy to use.** It will allow you to **enjoy pure, forest-like air** all around you.

The Best Technology for the Best Results

Zepter International researchers, experts and technicians have designed and built a **real innovative device for you.**

This application uses highly sophisticated technology capable of dealing with all kinds of threats to both your breathing and health. One of **Therapy Air Ion's** main characteristics is that its **incredible power and technology** can be operated using a **simple, direct user interface.** Your preferred settings can be programmed in at the touch of a button.

Therapy Air Ion is the ideal solution for keeping living spaces clean and safe as it **filters, purifies and enriches the air with negative ions.**

The action of its failsafe filtering system is further enhanced by the properties of the negative ions emitted.

This powerful appliance consists of:

- a five-level filter system
- a negative ion generator

working together to ensure unimaginably clean, pure air.

5 Filters, a Unique Barrier

The Zepter Therapy Air Ion is fitted with 5 different air-purification filters:

- **antistatic filter** (Pre-Electrostatic Filter);
- **antibacterial filter** (Medium Filter);
- **HEPA filter** (HEPA Filter);
- **anti-allergenic filter** (AG Allergy Filter);
- **activated-carbon filter** (AC Deodorant Filter).

All the filters are located in a special case and fit together to make a single component. They take up little space and can be easily replaced.

All air pollutants are eliminated when they pass through the 5 filters which act just like impenetrable barriers.

1 - ANTISTATIC FILTER

(Pre-Electrostatic Filter) removes larger particles of dust, mould, hair, dandruff, pet hair, etc.

2 - ANTIBACTERIAL FILTER

(Medium Filter) removes the remaining small particles of dust, bacteria larger than 1 micron, pollen etc., while protecting the HEPA filter located next to it.

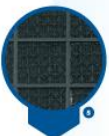

3 - HEPA FILTER

(HEPA Filter) eliminates the tiniest particles of dust and tobacco smoke while the anti-bacterial thiabendazole (an organic anti-bacterial compound) removes bacilli, mould spores and germs thus preventing the risk of infection.

4 - ANTI-ALLERGENIC FILTER

(AG Allergy Filter) is a mixture of silver, apatite (a mineral) and an antibacterial agent that is especially effective against Legionella bacteria (*Legionella bacillus*) that are particularly dangerous for babies. The filter contains an extract of ginkgo biloba leaves that are very effectively used for asthma, lung diseases and circulation problems and to eliminate the causes of allergies, flu viruses and bacteria.

5 - ACTIVATED-CARBON FILTER

(AC Deodorant Filter) eliminates unpleasant food smells, toxic gases and other odours thanks to its high absorption characteristics.

These special filters are impenetrable for pollutants and only allow completely clean air to pass. Purified air enters the module containing the inbuilt ion generator where it is enriched with negative ions.

TherapyAir ion
By Zepter Group

A Nature-like Process

The clever insight of Zepter International was that of combining the effectiveness of special filters with the properties and roles played by negative ions.

Nature produces negative ions by releasing and linking electrons to neutral particles in the air. The **Therapy Air Ion** generator creates negative ions by using the **same principle:** its negative electrode produces a negative voltage, the discharge between the two electrodes forms electricity and the molecules between the poles receive a negative charge.

Negative ions can neutralise positive ions and the harm they can cause the human body thus rebalancing the bio-energetic fields and offering a consequent **improvement of all bodily functions and energy levels.**

Therapy Air Ion generates about 220.000 ions per cm³ in turbo mode, i.e. double the amount of air in the healthiest environments like that surrounding a huge waterfall for instance. Thanks to the **double action of its special filters and negative ions**, the Zepter Therapy Air Ionizer will quickly turn your home into a **real "fresh-air resort"**. You will breathe in pure air that has been enriched with negative ions and your family's mental and physical health will enjoy immense **benefits.**

Negative ions have been proved to help:

- raise **physical energy** levels
- increase **blood circulation**
- increase the **metabolism**
- boost the **body's immune system**
- prevent many **illnesses**
- relieve the symptoms of **asthma, allergies and respiratory illnesses**
- speed up the **recovery** process
- alleviate **headaches**
- neutralise the consequences of **stress**
- help eliminate fear and **depression**
- lift your **spirits**
- help **sleep well** again
- reduce the dangerous consequences of **stress**
- **rejuvenate** the body
- help concentrate and **remember better**
- **stimulate creativity and mental powers**

Purifying Action

Silent and efficacious, the Therapy Air Ion unit consists of sophisticated mechanisms and special individual components which enable it to run in a quite **simple way:**

- the ventilator sucks the air in from the room and ducts it into the filter system;
- the purified air then passes through the negative ion generator and is enriched with negative ions;
- when the negative ion concentration is high enough, the negative ions and the positively charged dust and micro-biological particles floating in the air are mutually attracted;
- the dust particles become heavier and, before falling to the ground, are completely eliminated by the Therapy Air Ion filter system;
- purified air is then ducted to the surrounding atmosphere.

The process is repeated constantly as long as Therapy Air Ion is working, with stunning effects.

Excellent Air Purification

A HEPA filter coated with an organic anti-bacterial material (Thiabendazole Type) and anti-mould substances to remove indoor pollutants in an instant.

Strong Deodorization

A special deodorant filter removes harmful gases and the smell of food or cigarettes. Toxic gases like VOCs (toluene, benzene, xylene, styrene), formaldehyde, ammonia, acetaldehyde, and acetic acid are completely removed (excluding carbon dioxide and carbon monoxide).

Negative Ion Generation

The vast quantity of negative ions generated lets you enjoy really fresh air.

Ag allergy shield filter

Ag/Apatite, Anti-Legionella antimicrobial is a non-woven fabric to remove bacteria and Legionella bacillus which are particularly hazardous to infants. Ginkgo Biloba Leaf extract is processed in the body to remove allergenic materials, the influenza virus and bacteria.

Turbo Mode Operation

The unit purifies air in turbo mode in a very short time when pollution is due to an excessive amount of dust or odour.

Protection Looks Beautiful

The functionality and high technology of the Therapy Air Ion is perfectly reflected in its **sober and modern design.** Its flat shape and stylised control panel form a wonderful blend of technological materials and pleasant colours to make Therapy Air Ion a fashion icon that is just as much at home in classical as in modern surroundings.

Therapy Air Ion is elegant and very much in line with the latest trends in interior design. Its simple beauty belies the fact of its effectiveness in purifying the air you breathe.

You can enjoy an exclusive, beautiful device with excellent performance and unequalled user-friendliness.

This is a professional device for home use with the best looks you could ask for. Take a deep breath and look at it. It really is true - it is your Therapy Air Ion.
